

# Insertion Sort Demo

Refer to chapter 2 from Cormen

# Insertion Sort

An algorithm to sort an input sequence in-place

- Input: A sequence of numbers stored  $\langle a_1, a_2, \dots, a_n \rangle$
- Output: a reordering (permutation)  $\langle a_1', a_2', \dots, a_n' \rangle$  such that  $a_1' \leq a_2' \leq a_3' \dots \leq a_n'$
- The individual elements of the input sequence are called **keys**
- The input generally comes to us as an array with  $n$  elements
- So, **Input**: Array:  $A[1], A[2], \dots, A[n]$
- **Output**: Sorted array:  $A[1] \leq A[2] \leq \dots \leq A[n]$

# Implementation of Insertion Sort

**Input:** Array:  $A[1], A[2], \dots, A[n]$

**Output:** Sorted array:  $A[1] \leq A[2] \leq \dots \leq A[n]$

for  $j = 2$  to  $n$  do

$\text{key} = A[j]$

$i = j - 1$

    while  $i > 0$  and  $A[i] > \text{key}$

$A[i + 1] = A[i]$

$i = i - 1$

    end

$A[i + 1] = \text{key}$

end

# Example

Array A

9	10	2	4	1	8
---	----	---	---	---	---

Fig 1: Array to be sorted

# Example

Array A

9	10	2	4	1	8
---	----	---	---	---	---

↑  
 $i = 1$

↑  
 $j = 2$   
 $key = 10$

$i > 0$  and  $A[i] > key?$

Iteration 1: Step 1

# Example

Array A

9	10	2	4	1	8
---	----	---	---	---	---

↑  
 $i=2$

↑  
 $j=3$

$key=2$

$i > 0$  and  $A[i] > key?$

Iteration 2: Step 1

# Example

Array A

9	10	10	4	1	8
---	----	----	---	---	---

↑  
 $i = 1$

↑  
 $j = 3$

key = 2

$i > 0$  and  $A[i] > \text{key}?$

Iteration 2: Step 2

# Example

Array A

9	9	10	4	1	8
---	---	----	---	---	---

$i = 0$

$j = 3$   
 $key = 2$

$i > 0$  and  $A[i] > key?$

Iteration 2: Step 3

# Example

Array A

2	9	10	4	1	8
---	---	----	---	---	---

$A[i+1] = \text{key}$

$\text{key} = 2$

Iteration 2: Step 4

# Example

Array A

2	9	10	4	1	8
---	---	----	---	---	---

↑  
 $i = 3$

↑  
 $j = 4$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 4$

Iteration 3: Step 1

# Example

Array A

2	9	10	10	1	8
---	---	----	----	---	---

↑  
 $i=2$

↖ ↑  
 $j=4$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 4$

Iteration 3: Step 2

# Example

Array A

2	9	9	10	1	8
---	---	---	----	---	---

↑  
 $i = 1$

↑  
 $j = 4$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 4$

Iteration 3: Step 3

# Example

Array A

2	4	9	10	1	8
---	---	---	----	---	---

↑  
 $A[i+1] = \text{key}$   
 $\text{key} = 4$

Iteration 3: Step 4

# Example

Array A

2	4	9	10	1	8
---	---	---	----	---	---

$\uparrow$   
 $i = 4$

$\uparrow$   
 $j = 5$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 1$

Iteration 4: Step 1

# Example

Array A

2	4	9	10	10	8
---	---	---	----	----	---

↑  
 $i=3$

↖ ↑  
 $j=5$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 1$

Iteration 4: Step 2

# Example

Array A

2	4	9	9	10	8
---	---	---	---	----	---

↑  
 $i=2$

↑  
 $j=5$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 1$

Iteration 4: Step 3

# Example

Array A

2	4	9	9	10	8
---	---	---	---	----	---

↑  
 $i=2$

↑  
 $j=5$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 1$

Iteration 4: Step 3

# Example

Array A

2	4	4	9	10	8
---	---	---	---	----	---

↑  
 $i = 1$

↑  
 $j = 5$

$i > 0$  and  $A[i] > \text{key}$ ?

$\text{key} = 1$

Iteration 4: Step 4

# Example

Array A

2	2	4	9	10	8
---	---	---	---	----	---

$i = 0$

$i > 0$  and  $A[i] > \text{key}$ ?

$j = 5$

$\text{key} = 1$

Iteration 4: Step 5

# Example

Array A

1	2	4	9	10	8
---	---	---	---	----	---

$A[i+1] = \text{key}$   
 $\text{key} = 1$

Iteration 4 : Step 6

# Example

Array A

1	2	4	9	10	8
---	---	---	---	----	---

$i > 0$  and  $A[i] > \text{key}$ ?

↑  
 $i = 5$

↑  
 $j = 6$

$\text{key} = 8$

Iteration 5: Step 1

# Example

Array A

1	2	4	9	10	10
---	---	---	---	----	----

$i > 0$  and  $A[i] > \text{key}$ ?

↑  
 $i = 4$

↖ ↑  
 $j = 6$

$\text{key} = 8$

Iteration 5: Step 2

# Example

Array A

1	2	4	9	9	10
---	---	---	---	---	----

$i > 0$  and  $A[i] > \text{key}$ ?  
↑  
 $i = 3$

↑  
 $j = 6$   
 $\text{key} = 8$

Iteration 5: Step 2

# Example

Array A

1	2	4	8	9	10
---	---	---	---	---	----

$A[i+1] = \text{key}$

$\text{key} = 8$

Iteration 5 : Step 3

# Example

Array A

1	2	4	8	9	10
---	---	---	---	---	----

Fig 2 : Array after sorting

**What will be the best case?**

sorted array  
↓

not going through the while loop even once.

# Example

Array A

1 comparison  
0 movements

1	2	4	8	9	10
---	---	---	---	---	----

↑  
 $i=1$

↑  
 $j=2$

Best case: All elements are already sorted

Fig 3: Best case of IS

## Example

Array A

1	2	4	8	9	10
---	---	---	---	---	----

$\uparrow$   
 $i=2$

$\uparrow$   
 $j=3$

Best case: All elements are already sorted

Fig 3: Best case of IS

2 comparison  
0 movements

## Example

Array A

3 comparison  
0 movements

1	2	4	8	9	10
---	---	---	---	---	----

$i=3$  ↑

↑  $j=4$

Best case: All elements are already sorted

Fig 3: Best case of IS

## Example

Array A

1	2	4	8	9	10
---	---	---	---	---	----

↑  
 $i = 4$

↑  
 $j = 5$

Best case: All elements are already sorted

Fig 3: Best case of IS

4 comparison  
0 movements

## Example

Array A

5 comparison  
0 movements

1	2	4	8	9	10
---	---	---	---	---	----

↑  $i=5$     ↑  $j=6$

Best case: All elements are already sorted

Fig 3: Best case of IS

**What will be the worst case?**

↳ reverse sorted array

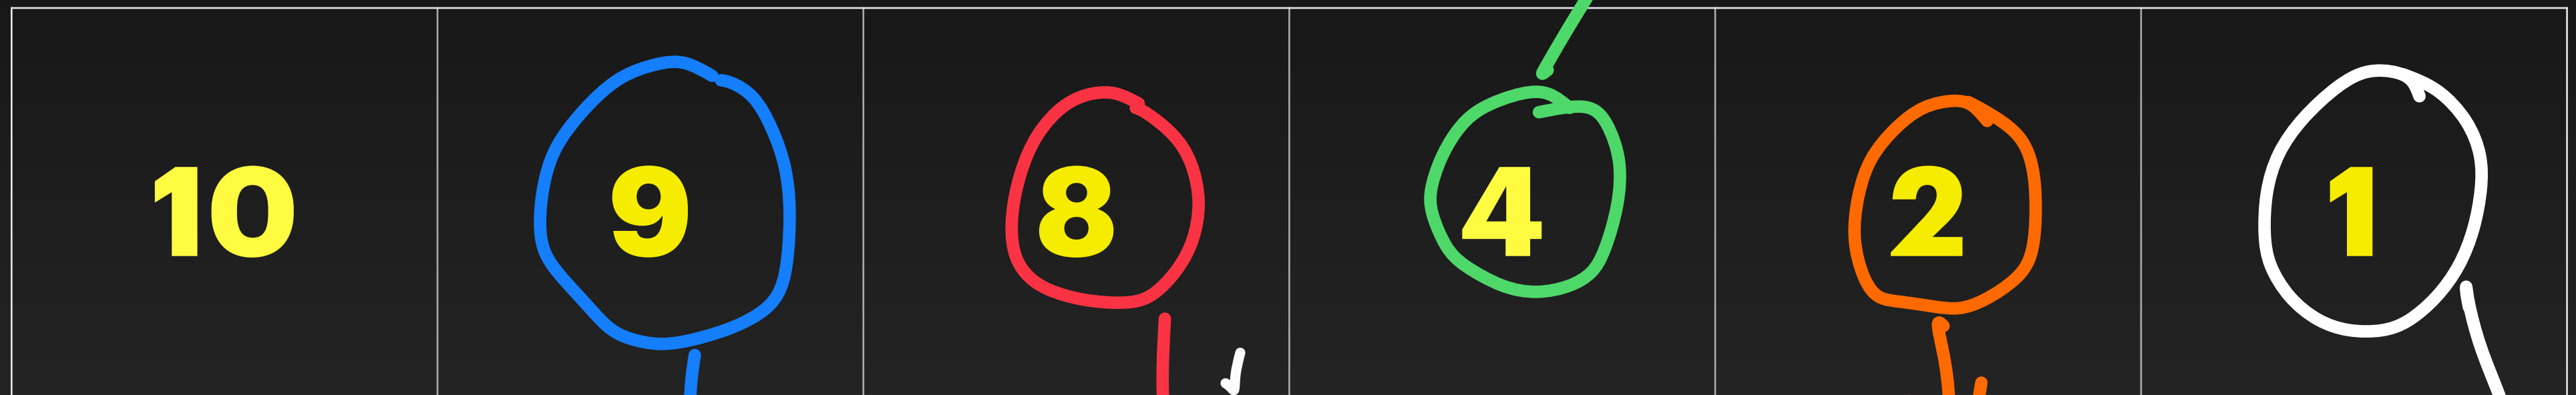

for EVERY element, go through the  
while loop.

Fig 3: Worst case  
of IS

## Example

Array A

key { 3 comparisons  
+  
3 movements

key

1 comparison  
+  
1 movement

key

2 comparisons  
+  
2 movements

key

1 + 2 + 3 + ... + (n-1)  
comparisons  
+  
1 + 2 + 3 + ... + (n-1)  
movements

key

$\frac{n(n-1)}{2} C$   
 $\frac{n(n-1)}{2} M$

# Insertion Sort.

Worst case

$O(n^2)$

Best case

$O(n)$

Average case

$O(n^2)$

# Programming Assignment

## Implement Insertion Sort

- ▶ Count the number of key comparisons and assignments for various inputs and plot the graph for both of them.
- ▶ For every input size  $n$  , run it with 10 different data points generated randomly.
- ▶ Compute the minimum, maximum and average of the number of key comparisons (and assignments) for each input size.
- ▶ Plot the graph for each case - best, worst and average number of comparisons (and assignments) .
- ▶  $n$  varies from 10 to 100 in steps of 5.
